Dr. Soons is most famous for his 3D imaging of the Shroud of Turin based on discoveries made in New Mexico in 1976. Employing contemporary technology, Dr. Soons makes the Shroud viewable in 3D without the use of 3D glasses. He has produced a hologram and models from the Shroud that have been featured in Shroud exhibits around the world. We are truly blessed by his return to Alamogordo where he is continuing his studies of the Shroud using instruments and images on loan by the Shroud Exhibit and Museum director, Deacon Pete Schumacher and Vice President, Susan Wagner. Please feel free to join this live, interactive transmission of Dr. Soons' presentation direct from the Shroud Exhibit and Museum in Alamogordo, New Mexico, starting at 8:00 p.m. on Friday, June 1, 2012.
